

Mail Server Information

Here you will find the necessary server information to access your email. Looking for webmail access?

You can access your email from any internet connected device world-wide using our web-mail. Most of our customers will be able to login to their mailbox by going to <http://mail.nlis.ca>, but if you are getting a message on the login page that says "insecure" form or connection, you can also use our SSL enabled login page at <https://webmail.emailsrvr.com>

If you are having trouble with your email account, we recommend starting with our handy new email support wizard at <https://help.emailsrvr.com>

The following settings will be all that you need to get your email up and running on your computer whether you are using Microsoft Outlook 2003, Outlook 2010, Mozilla Thunderbird, Windows Live Mail, or any other "mail client".

If your email address ends in @nlis.ca, use the following table to find your settings (SSL is optional):

Incoming Server Type:

Incoming Server Type:	Server Name:	Port:
POP3	mail.nlis.ca	110
IMAP	mail.nlis.ca	143
POP3 with SSL	secure.emailsrvr.com	995
IMAP with SSL	secure.emailsrvr.com	993

Outgoing Server Type:	Server Name:	Port:
SMTP	mail.nlis.ca	25, 587, 8025, or 2525
SMTP with SSL	secure.emailsrvr.com	465

If your email address ends in @granite.mb.ca, then use the following settings instead:

Incoming Server Type:	Server Name:	Port:
POP3	mail.granite.mb.ca	110
IMAP	mail.granite.mb.ca	143
POP3 with SSL	secure.emailsrvr.com	995
IMAP with SSL	secure.emailsrvr.com	993

Outgoing Server Type:	Server Name:	Port:
SMTP	mail.granite.mb.ca or smtp.granite.mb.ca	25, 587, 8025, or 2525
SMTP with SSL	secure.emailsrvr.com	465

Outgoing servers require SMTP authentication. Microsoft Outlook users will need to manually enable this feature.

Note: When entering your User Name, please enter your entire email address (e.g., myname@nlis.ca).
